¹ - (% reduction by 2050 compared to 1990 levels, unless stated otherwise)

² - Actual target is absolute, aiming to reach 39 Mt CO₂-eq of emissions by 2050, which is equivalent to 80% reduction against 1990 levels.

³ - The strategy is currently under review, with an updated version due to be published by 2018. The updated version will contain a revised goal of reaching GHG neutrality by 2050.

⁴ - Strategy consists of more than one document, published over several years

⁵ - In October 2017 a project to plan Portugal's transition to carbon neutrality by 2050 was launched by Prime Minister Antonio Costa
