## CHAPTER 2

### INTEGRATED NATIONAL ENERGY AND CLIMATE PLANS

#### Article 3

##### **Integrated national energy and climate plans**

1. By **31 December 2019, and subsequently by 1 January 2029** and every ten years thereafter<sup>30</sup>, each Member State shall notify to the Commission an integrated national energy and climate plan. The plans shall contain the elements set out in paragraph 2 [ ] **and** Annex I. The first plan shall cover the period from 2021 to 2030, **bearing in mind the longer term perspective**. The following plans shall cover the ten-year period immediately following the end of the period covered by the previous plan.
  
2. The integrated national energy and climate plans shall consist of the following main sections:
  - (a) an overview of the process followed for establishing the integrated national energy and climate plan consisting of an executive summary, a description of the **public** consultation and involvement of stakeholders and their results, and of regional cooperation with other Member States in preparing the plan;

LONG-TERM [ ] STRATEGIES

*Article 14*

*Long-term [ ] strategies*

1. Member States shall prepare and report to the Commission by 1 January 2020 and **subsequently by 1 January 2029** and every 10 years thereafter, *and should update every 5 years [ ] if necessary*, their long-term [ ] strategies with a perspective of **at least 30 years**.

---

**1b. Member States' and the Union's long-term [ ] strategies shall** contribute to:

(a) fulfilling the Union's and the Member States' commitments under the UNFCCC and the Paris Agreement to reduce anthropogenic greenhouse gas emissions and enhance removals by sinks **and to promoting increased carbon sequestration [ ]**;

(b) fulfilling the objective **of the Paris Agreement** of holding the increase in the global average temperature to well below 2°C above pre-industrial levels and to pursue efforts to limit the temperature increase to 1.5°C above pre-industrial levels [ ];
